

## Optical Fused Coupler

Fused couplers are used to split optical signals between two fibers, or to combine optical signals from two fibers into one fiber. Low insertion loss products with variety of coupling ratios are available.

### FEATURES

- Wavelength independent
- Low insertion loss and PDL
- High power handling
- Variety of coupling ratios available
- Excellent environmental and mechanical stability

### APPLICATIONS

- Signal monitoring in EDFA
- Network performance monitoring
- CATV and local area networks
- Switches, testing instruments
