

# Consignment Reports

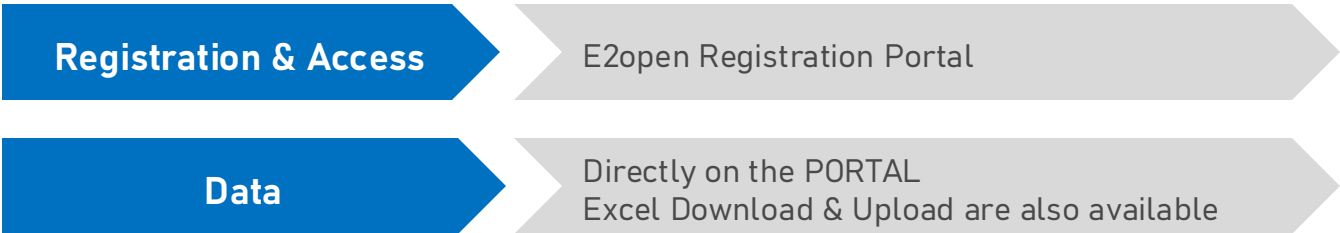

---

Report Access

**JABIL**

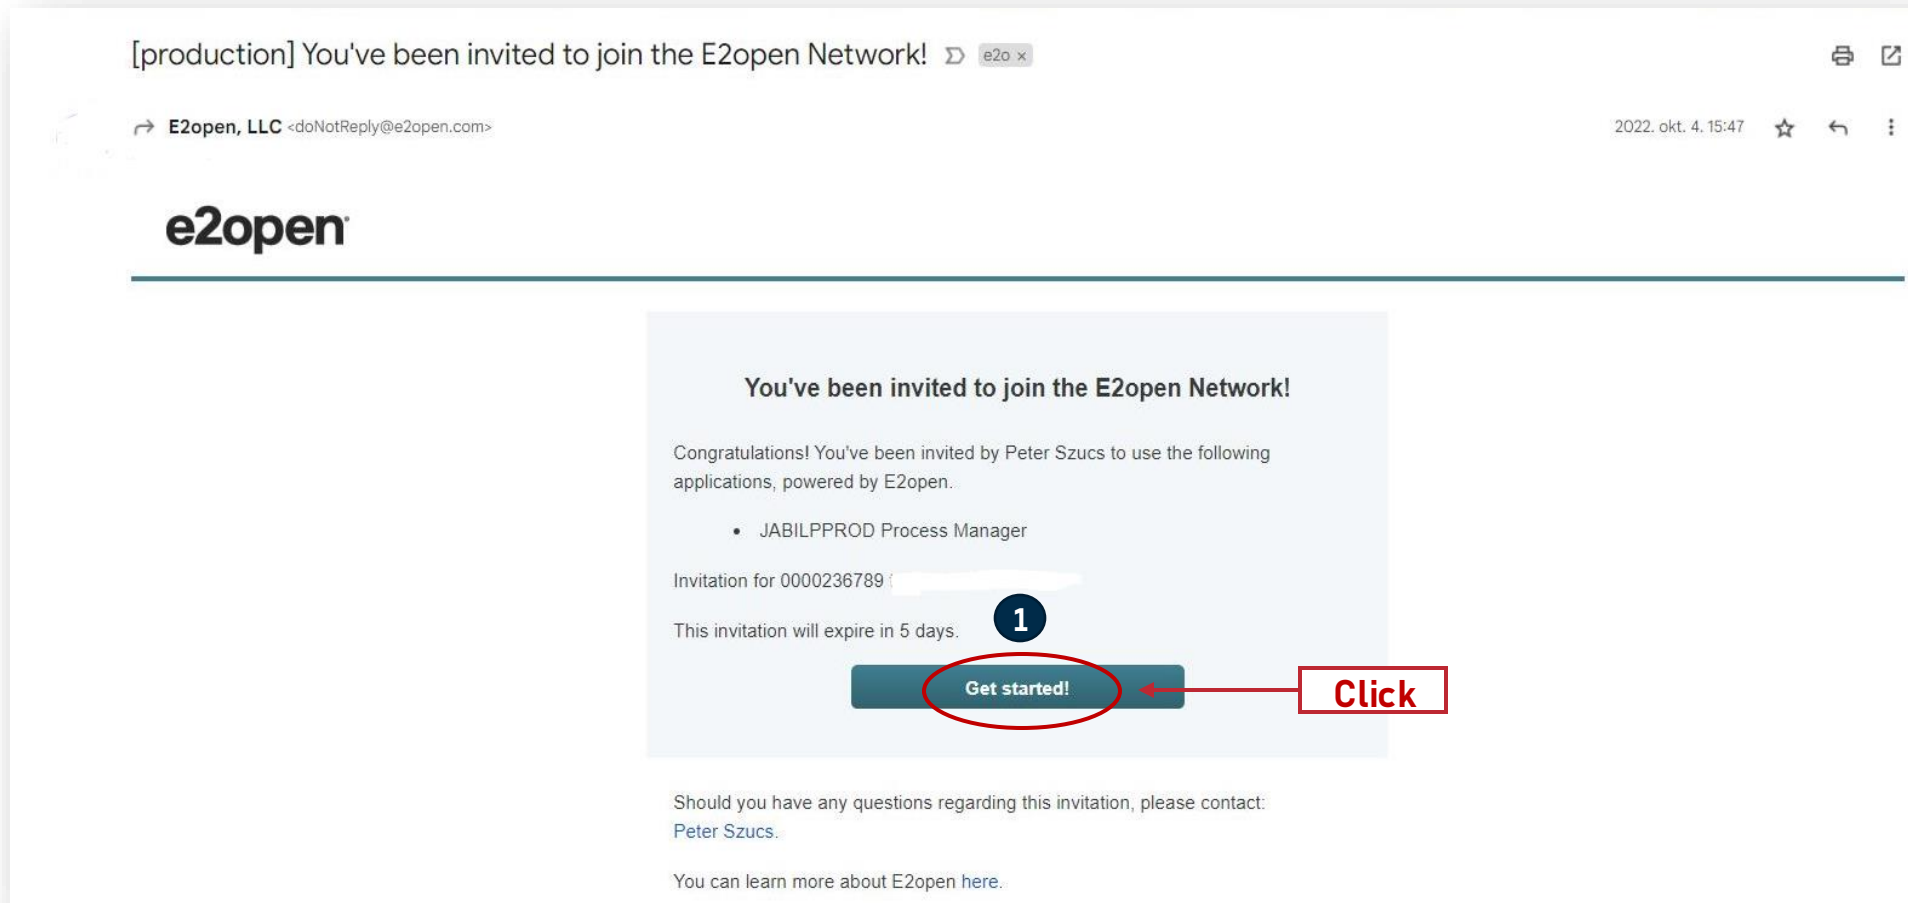

# Consignment Reports

- **The Consignment Report** provides an overview of the Supplier consignment inventory
- Access to the reports is available directly in e2open and no further navigation to PBI reports
- The SNC portal was fully replaced by the e2open Portal, and registration is required to gain access to it.
- Jabil will send an invitation email, and registration will be mandatory.
- Suppliers can register more email addresses if needed.
- Once registered, suppliers can log in to the e2open-Jabil portal at any time to view Consignment information.
- The portal provides visibility for real-time Consignment Inventory & Consignment Consumption data.

# System Invitation Email

- If you are new in e2open, you will receive an invitation email from the system >> **Click on GET STARTED!** (1)
- Then follow the instructions from the system to complete the **Registration**.

# Registration

1. Username by default is First Name and Last Name, but the username must be unique. If it already exists in the e2open database, you'll need to adjust it. Click on **GET STARTED!**
2. To log in, use the **email** address provided during registration or your **username**.
3. After login, you will be navigated to the e2open page. Click on **"JABIL Process Manager"**
4. In the drop-down, list select **"e2open Managed Users"** and tick the checkbox to remember your choice.

You've been invited to join the E2open network!

Register for access to E2open. Already have an account? Log in

All fields are required.

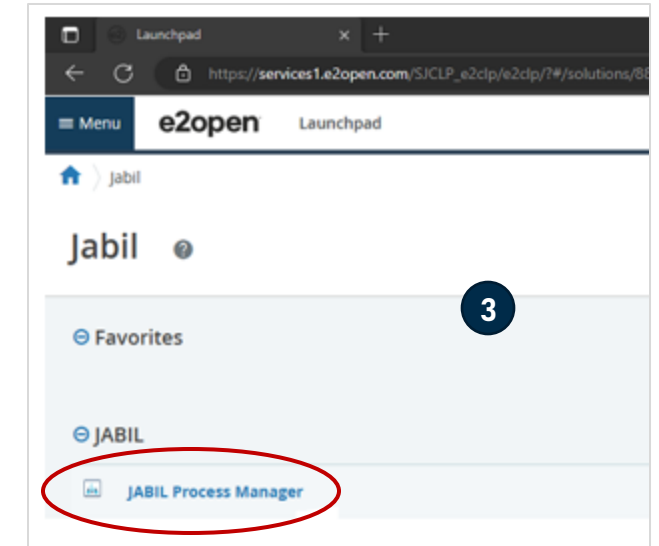

First Name: Mateusz  
Last Name: Lukaszewski  
Email: jabil.e2open@gmail.com  
Password: [masked]  
Username: mateuszlukaszewski2

By clicking the 'Get Started!' button, you are creating an E2open account, and you agree to E2open's Terms of Use and Privacy Policy.

Hide advanced options

Typically, you just need to log in with your email address, however a unique username is also required and has been generated for you. You can change this username, if you wish. Usernames must be unique and cannot contain an email address due to data privacy restrictions.

# Log in to e2open

After you complete the registration steps the system will send a confirmation email with a LINK what you can use for future log-in

# How to Access to Consignment Reports

- The Consignment Reports are available in e2open Portal after login
- You can access to the reports in **Menu > E2open Analytics > Consignment Reports (1)**.
- Then you can select the report based on the information you would like to check.
- As part of the enhancement, Consignment Usage by Jabil Part Number Report and Consignment Usage by Settlement Number have been combined in one report for your quick access.
- You can filter by JPN or Settlement Number depending on your needs.

# Consignment Usage by Jabil Part Number or Settlement Number

- This report provides **details about the consigned material pulled by Jabil**. Plant, Supplier, Buyer Part Number, Settlement Number, Material Movement Number and other fields are available in this report (1).
- The **Filters at top of the report** gives you flexibility of filtering data (2).
- You can **create your own filter** by clicking on **"Bookmarks"** (3). This filter is not saved as default view which means that every time you enter to this Report you will need to select your own filter.
- Search option is also available at column level. Click on the search icon  next to the column header to filter the data you preferred (4).

Plant	Supplier	Material Settlement Code	Material Movement Code	Transaction Date	Jabil Partcode	Quantity Pulled	Settlement Amount	Item Price	Doc. HeaderText (Medical)	Clearing Date (Medical)	Clearing Number (Medical)	Lot Number (Medical)	Settlement Date (Medical)	Jabil Batchcode
			5733302480	12/06/2024		308.00	0.00							
			5829703458	02/12/2024		-13.00	0.00							
			5829703458	02/12/2024		-40.00	0.00							
			5829936415	02/13/2024		300.00	0.00							
			5829936415	02/13/2024		100.00	0.00							

# Consignment Inventory Report

- This report provides information about the current consigned inventory. Information like **Plant, Supplier, Jabil PN, On Hand Qty, Pulled Qty, Received qty and other fields are available in this report (1).**
- The **Filters at top of the report** gives you flexibility of filtering data (2).
- You can **create your own filter** by clicking on **“Bookmarks” (3)**. This filter is not saved as default view which means that every time you enter to this Report you will need to select your own filter.
- Search option is also available at column level. Click on the search icon  next to the column header to filter the data you preferred (4).

The screenshot displays the Jabil Qlik interface for the 'Current Consignment Inventory Report'. The dashboard includes a top navigation bar with the Jabil logo, user information (Fatima Guzman), and a '23.3 Upgrade Features' notification. Below the navigation, there are tabs for 'Analizar Hoja' and 'Narrar Narración'. The main report area is titled 'Current Consignment Inventory Report' and features a 'Dimensions' filter bar with 'Plant', 'Supplier', and 'Jabil Partcode' selected. The report is divided into three sections: 'On Hand Inventory', 'Inventory (Daily Summary)', and 'Inventory (Details)'. Each section contains a table with various columns. Annotations are placed on the image: '1' points to search icons in the 'On Hand Inventory' and 'Inventory (Details)' tables; '2' points to the 'Dimensions' filter bar; '3' points to the 'Marcadores' (Bookmarks) dropdown menu; and '4' points to a search icon in the 'Inventory (Daily Summary)' table.
